Abstract
Transcatheter Mitral valve replacement represents the next frontier in cardiac valve therapy. This review article details the authors’ experience thus far in the development of a novel catheter-based mitral valve replacement device, and also highlights the preliminary experiences of other new technologies.

Key Words
Mitral valve replacement • Mitral regurgitation • Transcatheter valve replacement • Ischemic mitral regurgitation • General

Conflict of Interest
The authors each have ownership interest in Annulon LLC, which is a company formed around this and other mitral valve technologies
